

## Website Workflow:

1. **User Visit:**
  - User lands on the homepage.
  - Navigation to product categories (Men, Women, Kids, Sports) is available.
2. **Product Browsing:**
  - User browses products on category pages.
  - Products can be filtered by size, color, price, or brand.
3. **Add to Cart:**
  - User selects a product.
  - On the product page, user can choose size and color, then clicks “Add to Cart.”
  - The cart is updated with the selected products.
4. **Shopping Cart:**
  - User navigates to the cart page to review products.
  - Option to modify quantities or remove items from the cart.
  - User can proceed to checkout by clicking “Checkout” button.
5. **Login / Account Creation:**
  - User is prompted to log in or create an account.
  - Account details (email, password, etc.) are entered.
  - If the user is a guest, they proceed to checkout without creating an account.
6. **Checkout Form:**
  - User is redirected to the checkout page.
  - A form is displayed asking for details like name, email, address, phone number, etc.
  - Once the form is filled out, the user clicks “Submit.”
7. **Create Customer and Order in Sanity CMS:**
  - A GET request is sent to the API with the user details and order information.
  - A new customer record is created in Sanity CMS with the provided information.
  - Order data, including products and quantities, is saved in Sanity CMS with a reference to the customer.
8. **Payment:**
  - After order creation, user is redirected to the payment page.
  - User selects a payment method (credit card, PayPal, etc.) and enters payment details.
  - Payment is processed through Stripe.
  - Payment status is updated in Sanity CMS.
9. **Shipping:**
  - After payment confirmation, the system requests shipping labels and tracking information from ShipEngine.
  - Shipping details are saved in Sanity CMS, along with tracking number and shipping status.
  - User receives a confirmation email with order and tracking details.
10. **Order Confirmation and Tracking:**
  - Order confirmation page is shown to the user.

- User receives an email with order confirmation, payment receipt, and tracking information.
- User can check the order status and track the shipment through the website.
